jingjing052704@gmail.com | 09562657521 | Negros Occidental, Philippines

PROFESSIONAL SUMMARY

Experienced in deploying production-grade systems for state university and government institutions. Passionate about building web and software applications with a keen eye for detail and a dedication to delivering exceptional user experiences. I enjoy transforming ideas into functional, efficient, and visually appealing solutions through clean code, modern technologies, and continuous learning. Knowledgeable in troubleshooting, networking, email systems, web technologies, databases, security, documentation, and hosting platforms.

TECHNICAL SKILLS

Development

- **Frontend** : HTML, CSS, JavaScript, TypeScript, Bootstrap, React
- **UI/UX & Design** : Figma, Framer, Canva
- **Backend** : PHP, Laravel, Node.js
- **Databases** : MySQL, PostgreSQL, Supabase
- **Web Servers** : Apache
- **Hosting Platforms** : Vercel, Hostinger
- **CI/CD & Automation** : GitHub Actions
- **Version Control** : Git, GitHub
- **AI-Assisted Development** : Antigravity, Codex, Claude

Technical Skills

- Troubleshooting
- Internet & Networking
- Computer Navigation
- Documentation
- Security

WORK EXPERIENCE

Software Developer

Feb – May 2026

Provincial General Services Office – Property Management Division – Internship

- Developed a lot allocation and property monitoring system featuring interactive mapping, document management, Excel reporting, real-time dashboards, and role-based access control to streamline government property operations.

RECENT PROJECTS

Deployed :

Integrated Online Platform for Academic Grade and Report Management

2025

Carlos Hilado Memorial State University – Alijis

- Developed a comprehensive academic management system featuring role-based dashboards, automated grade computation, online grade viewing, QR code attendance tracking, email notifications, and PDF/Excel report generation for streamlined school operations.

Unified Lot and Property Management and Monitoring System

2026

Provincial General Services Office–Property Management Division

- Developed a digital platform for managing government housing lots and property assets, featuring separate modules for lot and property management, beneficiary and payment tracking, document management with duplicate checking, interactive mapping using Leaflet.js, real-time dashboards with charts, Excel bulk import/export, and print-ready report generation.

EDUCATIONAL BACKGROUND

Bachelor of Science in Information Technology

2022–2026

Carlos Hilado Memorial State University – Alijis

CERTIFICATE ATTAINMENTS

- **TesDome**
 - HTML/CSS
 - PHP
 - SQL
- **Cisco**
 - Networking Devices and Initial Configuration
 - Network Addressing and Basic Troubleshooting
 - Networking Basics
- **Koenig Solutions**
 - Unleashing ChatGPT Agent Mode – From Chatbot to Autonomous AI
 - AI x Enterprise Architecture – Powering Emerging Tech
 - Usage of AI Tools in Cyber Security
 - Understanding Project Management from Basic to Advance
 - 10 Keys to Mental Health at Work – Support Wellbeing with AI Tools
