

GIAN CARLO N. ULEP

Software Developer

jingjing052704@gmail.com | 09562657521 | Negros Occidental, Philippines

SUMMARY

Results-driven Software Developer with experience delivering full-stack solutions for government and academic institutions. Proficient in React, Next.js, PHP, Laravel, MySQL, and modern web technologies, with a strong background in system design, data management, authentication, reporting, and interactive mapping. Committed to developing reliable, efficient, and maintainable software while continuously expanding technical expertise.

WORK EXPERIENCE

Full-Stack Developer & Systems Administrator	Feb – May 2026
Provincial General Services Office – Property Management Division	
Improved property management by developing a system for lot allocations and property donations. Increased data accuracy by migrating legacy records into a unified database. Simplified payment processing by implementing beneficiary and amortization tracking. Enhanced property monitoring by integrating interactive maps with Leaflet. Reduced manual paperwork by building a secure document management system. Optimized reporting by creating Excel import and export features. Improved decision-making by designing dashboards with real-time statistics. Strengthened security by implementing role-based access control and authentication.	

RECENT PROJECTS

Deployed :	
Integrated Online Platform for Academic Grade and Report Management	2025
Carlos Hilado Memorial State University – Alijis	
Created an academic management system for Carlos Hilado Memorial State University. Built separate dashboards for administrators, faculty, and students. Managed student, faculty, enrollment, program, and section records. Reduced manual grading by adding automatic grade computation. Allowed students to check grades and enrollment status online. Used QR codes to make attendance recording faster and easier. Sent email notifications for account verification and password recovery. Generated PDF and Excel reports for school records.	
Unified Lot and Property Management and Monitoring System	2026
Provincial General Services Office–Property Management Division	
Developed a digital platform for managing government housing lots and property assets. Built separate modules for lot management and property management. Tracked beneficiaries, lot assignments, and payment records. Added document management and duplicate transaction checking. Used Leaflet.js to display lot boundaries and property locations. Created dashboards with charts and real-time statistics. Supported bulk operations through Excel import and export features. Generated print-ready reports for official records.	
Others Web Applications :	
Capstone Archive Management System	2023
Volunteering Management System	2024
Patient Appointment System	2025
QR-Code Based Memorandum Distribution System	2025

EDUCATION

Bachelor of Science in Information Technology	2022–2026
Carlos Hilado Memorial State University – Alijis	

TECH STACK & TOOLS

- React - Next.js - Tailwind CSS	- PHP - Laravel - MySQL	Git
